

Register for "Green HVAC Done Right!"

an EarthWise™ Systems Seminar

Reduce first cost. Lower operating cost. Enhance comfort.

exclusive invitation from Trane

How will your business survive the challenging economic times ahead?

This Trane "**Green HVAC Done Right**" seminar will discuss best practices that building owners and HVAC designers are using to save money and create a competitive edge. Learn how EarthWise™ Systems can help provide documented, sustainable high-efficiency/low-emissions products, systems and services that can help both you and your clients.

This open discussion will begin with an update on the latest in systems and designs that provide not only improved sustainability, but also high efficiency. Focus will be on strategies to reduce initial costs and operating expenses while enhancing comfort, acoustics, and indoor air quality—all of the things that are important to a productive workforce.

Discussion facilitator:

Eugene Smithart, PE

Director, Trane Systems and Solutions

"Smitty" is a recipient of the U.S. EPA Climate Protection Award and author of numerous industry articles. He earned his BS in Chemical Engineering from the University of Iowa, is a former Marine and has over 35 years of experience in the HVAC industry.

Please join Trane to discuss proven strategies and help each other ensure sustainable buildings now and into the future.

Earn 2 GBCI continuing education hours or AIA (HSW) learning units by attending.

Seating is limited, so please REGISTER TODAY!
