

Gas Efficiency: Gas-Fired Condensing Rooftop Units

JOIN ASHRAE PUGET SOUND AND BETTERBRICKS FOR AN EXCLUSIVE TRAINING ON GAS HVAC EFFICIENCY

ABOUT

This training will explore the gas-fired condensing rooftop unit (C-RTU) technology and its performance on commercial facilities. Highlighting the energy efficiency benefits associated with C-RTUs, while debunking current myths, this training will present the gas efficiency of the technology and address its positive market potential.

The American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) Puget Sound Chapter, in collaboration with BetterBricks, will be hosting an in-person training session that will:

- Show how to properly install equipment and manage the condensate, two of the most prominent yet least understood elements associated with the technology
- Cover codes and their interpretations for C-RTU installations
- Provide details on hot topics such as freeze protection, neutralizers and curb adaptors
- Prepare you to talk to customers about C-RTUs with suggested next steps

This technically-focused training will provide engineers, consultants, manufacturers, distributors and installers with market insights into a rapidly emerging HVAC technology and tips on where and how C-RTUs should operate.

Throughout this training, attendees will have the opportunity to learn installation and operation best practices from market experts and realize the full potential of this high-efficiency technology. Lunch will also be provided!

EARN CREDITS

Certificates of Attendance will be available from ASHRAE Puget Sound for all training attendees.

DATE AND SCHEDULE

Wednesday, February 7, 2018

12:00 pm – 1:00 pm

LOCATION

Smart Building Center
1200 12th Avenue South
#Ste 110
Seattle, WA 98144

COST

This event is free for all attendees and includes lunch.

PRESENTERS

- Christine Riegler, Program Manager at Northwest Energy Efficiency Alliance (NEEA)
- Marta Schantz, Manager at Waypoint Building Group
- Tiffany Rourke, President of ASHRAE Puget Sound
